The objective of this workshop is to provide an informal atmosphere for discussions of original research on signal processing techniques with underwater acoustic applications. The intent is to review theoretical and experimental research at an early stage of development. Particular areas of interest are:

- Adaptive processing in non-stationary interference
- Detection, localization or tracking, and classification
- Underwater acoustic communications
- Marine mammal related acoustic signal processing
- Multistatic sonar signal processing
- Performance analysis for active and passive sonar
- Physics-based signal processing algorithm design and analysis
- Synthetic aperture sonar

Research on other topics in Underwater Acoustic Signal Processing will also be considered. **There will be a special session on Continuous Active Sonar and a memorial session honoring Prof. Donald Tufts.**

Facilities limit attendance to 50 persons. Preference will be given to those presenting research results. Student presenters will pay a reduced registration fee. Abstract submission and registration directions may be found at <http://www.uasp.org>

Important dates:

July 15, 2013 - Deadline for abstract submission

Aug. 2, 2013 - Deadline for those wishing to attend but not present

Aug. 23, 2013 - Notification of accepted abstracts and attendees

Sept. 13, 2013 - Room block at Whispering Pines released

Oct. 16–18, 2013 - Workshop
